

SRS H&S Surplus Funds Spending Proposal

Date: 12/16/09

Requested By: SRS Technology Committee

Proposal Description: (general description of how money is to be spent) Install ceiling mounts for LCD projectors (22 LCD projectors were purchased by H&S last year).

Total Cost: \$ 6,694.20

Detailed proposal and additional supporting

information: (Please give price estimates as well as any extra supporting information such as designs, ways the school will benefit, if it can be used in subsequent years, if it is for curriculum based enrichment or any other thoughts you may have to aid the understanding of your proposal. Attach as much as needed.)

Thanks to the HAS initiative for technology at SRS we presently have 5 new SMART Boards being shared in our elementary classrooms and 1 mounted in our tech lab. Along with this technology we now have LCD projectors in every classroom. As you can imagine we have a plethora of wires streaming from computers to projectors to SMART Boards etc. This “spaghetti” makes utilizations of new technology inconvenient and dangerous. We would like to propose that we alleviate this problem by installing ceiling mounts and running all cable through the walls and ceilings as we already do in the tech lab and our library.

We are asking for 9 ceiling mounts at a cost of \$6,694.20 to help us begin to solve our problem. Any help from the HAS would be greatly appreciated.

Our goal is to have all classrooms equipped in this manner and to continue to add SMART Board technology in the years to come.

Sincerely,
SRS Technology Committee
